

We are pleased to invite you to the 6th Transport Congress on 14 May 2014 at the All-Russian Exhibition Centre (VVC) in Moscow. The Congress will take place alongside the following events: Expottraffic - the international traffic management exhibition, TransCon – the international transport construction and infrastructure exhibition, and INTERTunnel – the international exhibition for the construction and operation of tunnels and underground spaces.

### DRAFT PROGRAMME

#### Plenary session

##### Issues for discussion:

- Russian transport infrastructure: the current status and development forecasts.
- Development strategy for Moscow's transport hub and its implementation.
- The development of transport infrastructure and transport systems for cities.
- Innovative solutions within the transport system.

#### Round table "Safe operation of highways: ITS integration in Russia".

##### Issues for discussion:

- Intelligent transport systems - an important tool in making Russia's transport systems safe and efficient.
- Practical application of satellite navigation technologies in monitoring, control and management of the transport system.
- Monitoring and management of traffic and road safety.
- Ensuring the cooperation of the emergency services.
- Case studies into the successful implementation of toll roads (Moscow-St. Petersburg, M4 "Don", Western High-Speed Diameter).
- Design and installation of paid car parks - ways to regulate parking, deal with traffic jams and create a safe environment for the public.

#### Round table "Innovations in the construction of roads and bridges"

##### Issues for discussion:

- Organisational, design and technical solutions for road and bridge construction, in line with current urban development.
- Controlled-access highways – case studies into their successful integration within cities.
- Construction of transport hubs and park-and-ride facilities in cities.
- Innovative technologies, equipment and materials for the construction, repair and maintenance of roads and bridges.
- The role and importance of ITS in design, planning and management of road and bridge construction.

#### Round table «Transport tunnels for future highways»

##### Issues for discussion:

- Development of innovative technologies for the construction of tunnels and underground spaces in large cities.
- Construction of road tunnels in complex geological conditions (for example, in Moscow, St. Petersburg, Sochi).
- Development and improvement of the Metro network - the real way to solve transportation issues in a city.
- Increased onsite safety for tunnel and Metro construction projects.
- Ways to implement large-scale transport construction projects, combining two economic zones
- Ways to implement the long-term development plan of the Metro in Moscow in 2012- 2020.
